## Case Study

700+ Projects Delivered

14+ Years Experiences

100+ Expert Mentors

# Book a Horse Ride

## Business Need

The client wanted to establish their business online to give users a better option, so they can book horse riding services online and make the payment online. The client also wanted us to include a few other modules like Advertisement, so the customers can also sell or advertise on the platform after paying a particular amount and listing horse equipment. so the requirements were:

## Our Solution

So we developed a solution for the customers and the administration. A platform/Mobile and web applications so the customers can book services online by making payments online and tracking the booking status. The administration receives the booking and payment, and they confirm the booking

# GreenFreshFood

## Business Need

The Green Fresh Grub mobile app is to help friends, family, and couples to use when they're going out and can't decide on where to eat or where to go. The app will function like Tinder, swiping left/right, the left swipe means NO and the right swipe means YES. Similarly, in the app clicking on heart means Yes, the restaurant is liked and clicking on thumbs down means No, the restaurant is disliked. The app will be matching on places instead of people, using user's location to identify establishments within a certain radius of them and their choice of cuisine. The user will be able to access the app features as an individual user or will be able to invite friends and access features as group.

## Our Solution

So we developed a solution for the customers and the administration, A platform/ Mobile and web applications so the customers can Swap desire restaurant and online by making payments online and tracking the booking location

# Drafter King

## Business Need

The requirement was to build a fantasy games platform which is a strategy-based online sports game where players create a virtual team of real games playing in live matches worldwide. You earn points based on the performances of these players in actual matches. You must pick your best team of players and score higher than your opponents. Drafter King is truly one of the leading fantasy sports apps for fans.

## Our Solution

We built a web solution as per the clients requirements, where user can create teams and allow to join other teams. They earn point basis on the real life game and convert them in real cash with wallet functionality.

- User can create account and fill the required details to use the platform functionality
- Create virtual teams and earn real money
- Wallet system to add or withdraw money
- Group and individual chats

Fantasy cricket is a strategy-based online sports game where players create a virtual team of real cricketers playing in live matches worldwide. You earn points based on the performances of these players in actual matches. You must pick your best team of players and score higher than your opponents. Drafter King is truly one of the leading fantasy sports apps for fans.

## Food Mobile Application

Delicious restaurant app is a food service that improves your order experience, providing various types of food with the best price and the fastest delivery, when you use this app, you will be updated with new offers, track your order till delivered and contact with the delivery caption at any time.
